DETAILED ACTION***Allowable Subject Matter***

1. Claims 1-19 are allowed over the Prior Art of record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of claims 1 and 11 are the inclusion of the limitations of a fluid leakage detection apparatus including first and second valves being controlled via an adjusting portion to a pressure within a detection range; the pressure upstream of the first valve being higher than a predetermined reference pressure and a pressure downstream of the second valve being lower than the predetermined reference pressure, respectively, by controlling the first and second valves and then subsequently determining the leakage based on the change in a detected pressure. The closest reasonable Prior Art reference is US 6,070,453 to Myers (see Fig. 5 below) which discloses an apparatus and method for determining leakage in conduits (18) by the controlling a plurality of valves (V13-V19), however, different than the apparatus and method of the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McCarthy, Kimata et al., Mullins, Standifer, Miyauchi et al., Sato et al., Namba, Moody, Hoffman, Fukuda, Jordan et al., Hatsuno et al. and Hamada all teach various aspects of the instant invention, including apparatuses and methods for detecting/determining leaks within pipes/conduits including pressure source means and valves.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fitzgerald whose telephone number is (571) 272-2843. The examiner can normally be reached on Monday-Friday from 7:00 AM to 3:30 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams, can be reached on (571) 272-2208.
